

What Is A Mutual Fund?

A mutual fund is an investment scheme consisting of a pool of funds collected from many investors. This pool of funds is invested in various assets including stocks, bonds and money market securities. The performance of the Fund is shared by all investors.

Why Choose A Mutual Fund?

Diversification: A mutual fund allows you to invest in a balanced portfolio of a broad range of investments without having to build a portfolio of individual assets on your own.

Expertise: The Funds are managed by a team of experienced professionals whose priority is to earn optimum returns on your investment.

Reduced Costs: Mutual fund investments prove less expensive than paying an investment professional to manage your individual portfolio, and buying and holding the assets in your account.

Consultations are as important to us as they are to you. Our Financial Advisors will be happy to address all your queries about JN Mutual Funds and the management of your portfolio.
