Jamaica's Manufacturing PPI Decreases while Mining & Quarrying PPI Increases in July

According to the Statistical Institute of Jamaica (STATIN), the Producer Price Index (PPI) for the 'Mining and Quarrying' industry went up by 5.9% year-over-year between July 2022 and July 2023. This was due to an increase in the 'Bauxite Mining & Alumina Processing' Index (up by 5.9%) and was strengthened by an increase in the 'Other Mining and Quarrying' Index (up by 4.3%). The 'Manufacturing' Index fell by 1.9% when compared with July 2022. This decrease was mainly due to a fall in the major group 'Refined Petroleum Products' (down by 20.2%), but was tempered by upticks in the major groups 'Food, Beverages & Tobacco' (up by 2.9%) and 'Chemicals & Chemical Products' (up by 2.8%). The Producer Price Index (PPI) tracks the average change in selling prices obtained by domestic goods and service producers over time.

Meanwhile, month-over-month the 'Mining and Quarrying' index increased marginally by 0.2%. This month-over-month upward movement was primarily influenced by an increase in the 'Bauxite Mining & Alumina Processing' Index, which was due to the depreciation of the Jamaican dollar against the United States dollar. Similarly, the PPI for the 'Manufacturing' industry grew 0.6%. This month-over-month increase in Manufacturing was largely driven by a 4.1% uptick in 'Refined Petroleum Products' as well as a 0.2% increase in 'Food, Beverages & Tobacco'. However, the overall increase was moderated by a 1.9% decline in the index for the major group 'Chemicals and Chemical Products'.

The Company's Jamaican operations continue to have a significant impact in the local marketplace through its Best Dressed Chicken and Hi-Pro divisions. The Group is best described as a vertically integrated poultry business with operations spanning the full gamut of poultry rearing as a means for food production. In our view, these acquisitions and other inorganic initiatives are expected to be the catalyst for JBG's growth going forward.
