

US Consumer Long-Term Inflation Expectations Hit 12-Year High

US long-term inflation expectations unexpectedly accelerated in early May to a 12-year high and consumer sentiment soured, reflecting growing concerns about the economic outlook. Consumers see prices climbing at an annual rate of 3.2% over the next five to 10 years, according to the preliminary May reading from the University of Michigan. They anticipate costs rising 4.5% over the next year, compared to last month's 4.6%, data on Friday showed. The consumer sentiment index slid to 57.7, the lowest since November and weaker than all forecasts, from 63.5 last month.

Consumer confidence also dropped sharply during the 2011 debt-ceiling crisis but snapped back after its resolution. A combination of high inflation and recession concerns has long weighed on sentiment. That said, spending has generally held up with the help of widespread job opportunities and continued wage gains. A necessary component of returning inflation to the Fed's 2% target is keeping long-term inflation expectations anchored at a low level. While the pickup is concerning, noted were the few signs consumers were buying in advance to avoid future price increases. That suggests the rise in long-run inflation expectations did not reflect the growing influence of inflationary psychology or increased risk of a wage-price spiral.

Buying conditions for durable goods declined to a five-month low in early May, with about 42% of respondents blaming high prices for eroding their living standards. Consumers' perception of the economic outlook over the next 12 months and five years both fell to the lowest since July. While views of their current financial situation improved slightly, expectations deteriorated. The university's overall measure of expectations fell to a 10-month low of 53.4. The current conditions gauge also decreased.

Grace Kennedy Ltd (GK)	Current Price	\$78.79	EPS	\$7.45	ROE	9.93%		<p>Despite elevated levels of geopolitical tensions and supply chain disruptions, we expect the GK's strong resiliency to persist even as the company make significant changes to ensure its products and services are delivered to its customers across the various channels. These include ensuring its international supply chains remain strong, active, and efficient. Its recent agreement with Nestle is one such initiative that GK has implemented to improve its distribution as the Group moves closer to achieving its goal of creating a wider wingspan in the global arena. We believe that GK is poised for further sustainable growth given its well diversified businesses across its two segments which will likely be boosted by inorganic growth from acquisitions. GraceKennedy Limited has initiated its multi-year transformational strategy in which it seeks to achieve (i) sustainable efficiency, (ii) greater agility and (iii) revenue growth. To achieve these goals, the Group has made changes to its organisational and cost structure as well as its business processes which have so far resulted in an upswing in its margins and profitability, and which augurs well for the Group's future.</p>

Jamaica Producers Group (JP)	Current Price	\$21.07	EPS	\$1.30	ROE	7.75%		<p>Undoubtedly, COVID-19 has had a negative impact on aspects of JPs business over the last two years and could continue to weigh on some of those segments in the short term. Further, inflation, supply chain issues, reduced business confidence and trading due to the war in Ukraine, and ongoing economic uncertainty related to the pandemic will present challenges in the short term. However, the JP Group has remained strong, and the pandemic has created opportunities for new retail channels to offset the downturn anticipated in some. JP remains strong along several key financial metrics, including its relatively large equity base and growing cash and securities balance, providing the group with the flexibility to manage and execute on strategies of acquiring undervalued assets as they become available. Most importantly, JP continues to strengthen its operations and we anticipate that its recent acquisitions in the food and logistics businesses will likely further improve its capacity and drive its medium to long-term growth.</p>

Wisynco Ltd (WISYNCO)	Current Price	\$17.31	EPS	\$1.27	ROE	22.99%		<p>Today, Wisynco is a prominent manufacturer and distributor of beverages and food items in Jamaica. With one of the largest sales forces locally, with more than 700 sales-related employees, Wisynco boasts a sales and distribution infrastructure that has a significant presence in the marketplace. As its customers typically include restaurants, supermarkets retail and wholesale outlets, schools and other food service outlets, during the pandemic its customer base was severely disrupted. Now with the restrictions which impacted its business negatively over the last two years removed, we anticipate that this will provide a fillip to the company's revenue and profits in the short to medium term. Additionally, its strong balance sheet, particularly its cash position, not only positions the company to absorb shocks but also to capitalize on opportunities as they arise.</p>

JMMB Group Ltd (JMMBGL)	Current Price	\$29.28	EPS	\$3.93	ROE	16.04%		<p>Over the years, JMMBGL has successfully deployed its capital to generate returns for its shareholders. Traditionally, the Company has relied on interest income from repurchase agreements, dividend income from investment holdings, gains from securities trading and fees from Unit Trust management. Over the last ten years, Jamaica has seen a significant decline in interest rates, which has influenced financial entities to lean more towards generating fee income from areas such as asset management, investment banking and trading activity in contrast to interest income from repurchase agreements. To that end JMMBGL has grown its operations from strictly investment management, trading, stockbroking, and market-making activities to include commercial banking and while Jamaica remains the core of its operations, it has a significant presence in Trinidad and the Dominican Republic. Looking ahead, we anticipate that JMMBGL's earnings will be further diversified and boosted through its equity stake into "Sagicor Financial Corporation". One of SFC's strongest growth areas has been its USA operations and as a result, this investment has allowed JMMBGL to get exposure new markets and the insurance business line and anticipate that this will help the group to yield positive results over the short to medium term.</p>

Jamaica Broilers Group Ltd (JBG)	Current Price	\$34.20	EPS	\$3.87	ROE	18.90%	ROE	16.75%	Having been in operation for over sixty years, JBG has grown into an iconic Jamaican company with an increasing presence in the region. The Company's Jamaican operations continue to have a significant impact in the local marketplace through its Best Dressed Chicken and Hi-Pro divisions. The Group is best described as a vertically integrated poultry business with operations spanning the full gamut of poultry rearing as a means for food production. In our view, these acquisitions and other inorganic initiatives are expected to be the catalyst for JBG's growth going forward.
